Re: Recommendation Letter for Burling Ranger Company Inc.

The Burling Ranger Company Inc. has been awarded the masonry works on a number of NAC projects. Specifically the contract value of the Mattagami Water Pollution Control Plant Upgrade Project for the City of Timmins.

Burling Ranger's scope of work has included minor demolition of existing block structures, complete new buildings with brick veneer to match existing structures, new interior block walls and remedial masonry works site-wide. The work started in late 2013 and was substantially completed in early 2016. The work was finished on time with no issues, despite a demanding schedule and harsh winter conditions. The Masonry work was required to be completed in multiple phases as new construction was required to be completed while working within and around the existing operating plant.

North America Construction (NAC) would recommend Burling Ranger as a preferred masonry contractor. Burling Ranger was punctual, well organized and professional and worked well with the complete construction team to achieve the project schedule milestones and overall project goals. They have demonstrated the ability to be a competent, reliable and safety oriented company which at all times cooperatively adhered to all of NAC's and the City of Timmins' policies and procedures. We look forward to working with Burling Ranger in the future.

Kindest Regards,

Shawn Evoy
